Coronavirus Blues

**Oh I got things to do, and places to roam
But alas for now, I am stuck at home
Got to stay away from people, keep my distance from the folk
'Cause CoronaV is out there and it ain't no joke.**

Chorus:

**Now tell the story, and share the news
To help us all get through Coronavirus blues
Let's sing together, in a virtual way
Till Covid 19 has gone far, far away.**

**We're under firm directives not to gather together
Still walking is permitted, and I'm grateful for the weather
While I miss my friends and colleagues, and I know it's just the start
We'll adjust to this new normal, 'cause we have to do our part.**

Chorus

**Now my home is all set up so I can work and get things done
But I am not used to working without seeing anyone
The screen is good and useful, and I like to see your face
But my cats have no idea why all day I'm in their space.**

Chorus

**Many people will be hurting, some are close and some are far
So help a neighbor, donate blood, and remember who we are
Let's forge a new path forward, save the earth and protect rights
That means even with this virus, we must keep on with these fights.**

Chorus

**Yes, the future is uncertain, as this crisis looms ahead
Still I know we can be certain that we'll live, until we're dead
So let us all keep working for the things we hold most dear
Because before you know it, the future will be here.**

Chorus
